

## Ways to Improve Your Rhythm Content for Melodies

Try your hand writing your very first rhythm melody. Remember, pitches don't matter. It can be tempting to think of pitches as you are writing the rhythm melody, but focus on the rhythm. Don't use a piano.

||

||

Now, choose 1 thing to focus on to improve your rhythm. It's important to choose *only* 1. With that mind, rewrite your rhythm melody. I recommend spending 5-10 minutes tweaking the original.

## Rhythms from Pitches

Below is a pitch line. Use it to write a melody with rhythm. Make sure you don't change the pitches in any way, shape, or form. And use all the pitches.

Again, use that 1 thing you were going to improve on your rhythm melody and improve this melody. Don't change the pitches. Only change the notes.
